TRIBAL READY PBC

TRIBAL READY, PBC

Statement of

Capabilities

A Native-owned, controlled, and governed Public Benefit Corporation advancing Tribal Sovereignty in the digital age. Working with Tribal Nations plan, fund, build, own, and operate the digital infrastructure their futures depend on.

SERVING

Tribal Nations · Alaska Native Villages · Native Hawaiian communities

FOCUS

Broadband · Digital Sovereignty · Data Sovereignty

FROM THE OFFICE OF THE CHAIRMAN & CEO

Thank you for taking the time to learn about Tribal Ready.

As a Native-owned, controlled, and governed Public Benefit Corporation, we exist for a single purpose: to advance Tribal Sovereignty in the digital age, and to put the ownership of digital infrastructure where it belongs, in the hands of Native Nations.

The pages that follow outline the full range of what we do; from our flagship **Sovereign Digital Hubs™** and the governance that keeps data, infrastructure, and decision-making under Tribal control, to securing federal and state funding and designing, building, and operating broadband networks. Each capability is delivered by a team that blends technology, business, operations, and deep Tribal cultural knowledge.

We believe sustainable infrastructure is the foundation for economic independence, healthier communities, and stronger self-determination. Whatever stage your Nation is at, we would be honored to help you plan, fund, build, own, and sustain the connected future your community deserves.

Sincerely,

Joseph Valandra

Chairman & Chief Executive Officer

SECTION ONE **OWN & GOVERN THE INFRASTRUCTURE**

Connectivity is only worth building if the Nation keeps control of it. We lead with the infrastructure and governance that make that ownership real.

FLAGSHIP · INFRASTRUCTURE **Sovereign Digital Hubs™**

01 MODULAR DIGITAL INFRASTRUCTURE

Infrastructure the Tribe owns.

Commercial data centers demand significant power, water, and time, limiting where they can go. Sovereign Digital Hubs are built differently: modular and efficient, bringing compute, connectivity, and content onto Tribal land without using water and minimal power.

"This is how control is established, how value is retained, and how long-term positioning is secured."

WHAT AN SDH DELIVERS

- Tribal ownership of physical & digital assets
- Modular & efficient, low power, and no water
- Data residency on Tribal terms
- New revenue & economic development
- Scalability according to Nation's needs

02 **Digital & Data Sovereignty: Sovereignty Keeper™**

A governance layer that keeps Tribal authority intact across the entire digital stack.

Enforces Tribal law over data & access
Tribal control of operations & vendors
Tribal data stored on Tribal terms
Aligned to Indigenous data principles

BROADBAND SUPPORT

We help Native Nations own their digital future, not rent it.

Across the full life-cycle of digital infrastructure, the funding, the networks, and the operations; we work as a partner, not a vendor, keeping control and value with the Nation at every step.

OUR MISSION

Advancing Tribal Sovereignty to unleash the full power and potential of Native communities.

FULL LIFE-CYCLE DELIVERY

Plan	Fund	Design	Build	Operate	Sustain
Needs & feasibility	Grants secured	Network engineering	Construction mgmt	Billing & support	Long-term value

SECTION TWO **Fund & build the network**

03 Grant Funding & Federal Navigation

Securing the federal and state dollars that make Tribally-owned networks possible.

- BEAD, TBCP & state programs
- Application strategy & narratives
- Cybersecurity, supply-chain & business plans
- Mapping, compliance & reporting

04 Broadband Network Life-Cycle

End-to-end delivery of affordable networks built for rural, high-cost terrain.

- Feasibility & network design
- Construction management
- Operations & support (OSS/BSS)
- Built to sustain, not just launch

Every network we touch is engineered to be owned, operated, and sustained by the Nation — not the next provider.

SECTION THREE **Sustain, Advocate & Grow**

05 Network Sustainability & Business Planning

Making the network last financially and operationally long after deployment.

Financial modeling & forecasting
Sustainable operating & rate models
Tribal utility authorities & ISPs
Value retained, not extracted

06 Regulatory & Government Advocacy

A trusted ally through the high-stakes processes that decide who gets funded.

FCC, NTIA & state broadband offices
Spectrum, permitting & rights-of-way
Tribal interests in policy & funding
Turning plans into action

07 Workforce Development

Building capacity and jobs that stay in the community.

Train & certify local technicians
Build Tribal operating capacity
Skills & jobs that stay home

08 Partner Ecosystem & Platforms

Vetted partners and platforms, ready to deploy for Tribal communities.

Virtual Tribal Broadband Office
Hyper-local video & TV services
Cloud, OSS/BSS & construction partners

PROOF **Proof of capability**

Experience-led

TEAM OF EXPERTS

Seasoned broadband, funding, and operations professionals working in service of Native Nations.

Tribal-backed

DEPLOYED NETWORKS

Real networks funded, built, and running across Indian Country. Not promises, results.

Native-owned

PUBLIC BENEFIT CORPORATION

Owned, controlled, and governed by Native leadership, accountable to the Nations we serve.
